

# Corona Update #2 and Special Offer!

Hello again from Dr. Mike with another Corona update...

Our dental office is probably the cleanest, safest place you can be. Plus, we don't have a waiting room full of sick people. No crowds here!

We've got some appointments available next week, March 16 – 19. If you have pending treatment, we would like to extend a 15% savings to you, if you schedule during **next week only** (March 16 - 19). If you are already scheduled, and keep your appointment, we will offer the same savings. If you are a member of our in-house savings plan, we will offer either your applicable PBSS savings or 15%, whichever is greater. **Act quickly, as I think the schedule will fill up very soon! Now is a great opportunity to take care of yourself and save some money. One week only, limited availability.**

Besides sterilizing everything that isn't disposable, we pretty much "hose down" all other contact surfaces (even the front desk and counter) with a hospital-grade disinfectant that effectively kills Coronavirus. It also kills MRSA ("mersa"), HIV, and even Hepatitis C, which is considered one of the most difficult pathogens. It's good stuff! It works, even for things far worse than Corona. We do this every day. This is known as "universal precautions."

**Call us at XXX-XXX-XXXX. We are closed for the weekend, but Jo-Ann will check messages and get back to you.**
